

Dear Commisioners,

I urge you to maintain the current guidelines on media ownership. The increasing control of media access by a small number of companies is dangerous for democracy in this country. Although there has been an explosion in small cable outlets, the majority of Americans get their information from sources owned by an ever shrinking list of major corporations.

Freedom and democracy require free and easy access to information. Please do not allow more monopolization of the media.

Sincerely,

Mason Posner
